Founded in 2017, in the enchanting landscape of Switzerland, a country renowned for innovation and luxury, LAS Design creates extraordinary objects providing an olfactory and aesthetic experience.

Our goal was to revive an old Cuban tradition which involved dipping cigars in a glass of your favorite alcohol.

LAS Design created the world's first humidor designed to keep cigars in optimal conditions whilst also offering the opportunity to mature them using the liquid of your choice.

HUMIDIFYING SYSTEM

LAS Design humidors are based on the same concept; a glass unit to house your cigar and a flask where you pour the liquid of your choice to mature your cigar.

JUST FLAVOUR IT !

STEP 1

Place the stand in an area which is not in **direct sunlight**.

STEP 2

Insert the cigar **foot first** in the tube.

STEP 3

Half fill the flask with the chosen liquid.

STEP 4

Screw the flask and the glass tube together and leave the cigar to infuse for at least **7 days**.

PAIRING

Water that contains minerals or too much acid can wreak havoc on your valuable cigars. Using osmosis water or distilled water with LAS Design humidors will make all the difference and keep your cigar nice and fresh ready to be enjoyed.

When it comes to alcohols and cigar pairing, it is best to stick to the classics, such as a fine Cognac, Armagnac, Whisky or Rhum. There is one simple factor that can determine whether or not a drink will pair well, and that's the body. This means a full-bodied cigar, needs a full-bodied spirit that will not be overpowered by the cigar.

Balance is the key to a good pairing. With coffee or tea, you do not want to overpower one flavor with another. Therefore, a light roast coffee should be paired with a milder, sweeter cigar, and a dark roast coffee would match better with a full-bodied, stronger cigar. Similarly, a lightly perfumed tea would be more suitable.
